PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience in developing scalable web applications using Python, Flask, MySQL, HTML, CSS, JavaScript, and REST APIs. Strong foundation in backend development, database design, API integration, debugging, and software development best practices. Experienced in building end-to-end applications with Git version control and collaborative development. Passionate about writing clean, maintainable code and continuously learning modern software engineering technologies.

EDUCATION

B.Tech in Computer Science Engineering (AI)

2026

CGPA: 8.1 / 10

SVPP Institute of Technology

EXPERIENCE

Python Full Stack Trainee | Codegnan IT Solutions

April 2026 – August 2026

- Developed 2+ full-stack web applications with 10+ REST API endpoints using Python, Flask, MySQL, React.js, JavaScript, HTML5, CSS3, and Bootstrap.
- Built RESTful APIs and implemented CRUD operations with Flask and MySQL for efficient application data management.
- Designed relational database schemas, wrote SQL queries, and integrated frontend interfaces with backend APIs.
- Debugged application and database issues and used Git and GitHub for version control and source code management.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: HTML5, CSS3, Bootstrap, React.js

Backend: Flask, Django, REST APIs

Database: MySQL

Tools: Git, GitHub, VS Code

Concepts: Problem Solving, DBMS, OOP

PROJECTS

Shopii – Full Stack E-Commerce Platform | Live Website

React.js, Flask, MySQL, Razorpay

- Engineered a full-stack e-commerce platform using React.js, Flask, and MySQL with 10+ REST API endpoints, validated by 14+ users across authentication, cart, payment, and order workflows.
- Implemented secure user authentication with email OTP verification, session management, profile management, and role-based user/admin functionality.
- Integrated Razorpay payment gateway for online transactions and automated PDF invoice generation and order-confirmation emails after successful purchases.
- Built product search, category filtering, dynamic cart quantity and price calculations, order history, and inventory management using React.js, Flask, and MySQL.
- Deployed the React frontend on Vercel and Flask backend on AWS EC2 using Gunicorn for production deployment.

AI-Based Object Detection & Navigation Guidance System

Python, YOLOv8, OpenCV

- Developed a real-time object detection and navigation assistance system using Python, YOLOv8, and OpenCV for visually impaired users.
- Integrated YOLOv8-based object detection with left/right directional voice guidance using Text-to-Speech for real-time navigation assistance.
- Implemented priority-based obstacle alerts and an automated SOS email notification feature to improve user safety during navigation.

CERTIFICATIONS

JavaScript Basics Certification

Organization: Meta

React Basics Certification

Organization: Meta

Advanced React Certification

Organization: Meta

Python Basics Certification

Organization: HackerRank

ACHIEVEMENTS & ACTIVITIES

- Led a 4-member final-year team in developing an AI-based navigation system, coordinating development, testing, and integration.
- Completed a 5-day Data Analysis with Python workshop by Innomatics Research Labs, using Pandas, NumPy, Matplotlib, and Seaborn for data cleaning, analysis, and visualization.
- Won 1st prize for developing a Generative AI model during NxtWave's AI for Students program, demonstrating hands-on AI development skills.
